

Deliverable	Criteria	Excellent (Full Marks)	Satisfactory (Partial)	Needs Improvement (Low)
Explanation Video (5M)	Clarity & Timing (2M)	Concise 60s pitch; clearly outlines problem and solution.	Exceeds time limit or lacks clarity in the approach.	Unclear, poorly paced, or misses core project goals.
	Visual Aids (3M)	High-quality slide/infographic that significantly aids understanding.	Slide is present but cluttered or lacks professional finish.	No visual aid provided or irrelevant content.
Project Report (5M)	IEEE Formatting (2M)	Perfect adherence to the two-column IEEE template; physical copy provided.	Minor formatting errors; physical copy provided.	Failed to use template or no physical copy present.
	Technical Summary (3M)	Clear, professional summary of methodology, results, and conclusions.	Summary is descriptive but lacks technical depth or data.	Extremely brief or contains technical inaccuracies.
Source Code & Viva (10M)	Data & Pipeline (3M)	Rigorous dataset justification; clean, modular	Justification is weak; pipeline is functional	No dataset justification; pipeline is

Deliverable	Criteria	Excellent (Full Marks)	Satisfactory (Partial)	Needs Improvement (Low)
		pipeline with valid HPO.	but "spaghetti" code.	broken or illogical.
	Deployment & UI (4M)	Fully containerized; successfully deployed on Cloud (e.g., Beanstalk) with UI.	Containerized but deployment is local or UI is non-functional.	No containerization or deployment; CLI only.
	Viva & Selection Logic (3M)	Explicit, logical criteria for model selection; confident technical viva.	Logic for model selection is vague; average viva performance.	Cannot explain model choice or fails technical questions.
